

CP-22 Riparian Buffer on Marginal Pasture

Zone 1 & 2 is required

Zone 3 is not eligible

The entire CREP enrollment must be planted to hardwood trees.

The left side minimum width is 45' (30% of the flood plain) The maximum is 185' (the flood plain plus 35').

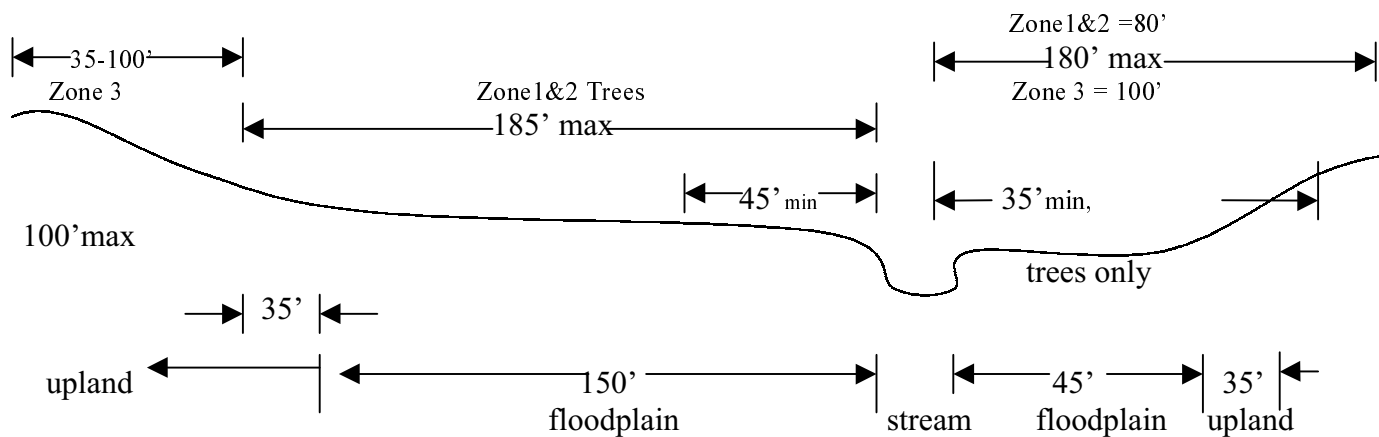

Right side minimum is 35' and maximum is 100'.

Eligible area for CP-22 in CREP is any portion of land between the minimum and maximum widths.

CP-22 Riparian Buffer on Cropland

Zone 1 & 2 is required

Zone 3 is optional, if needed

Zones 1 and 2 must be planted to hardwood trees.

The left side minimum width for zone 1&2 is 45' (30% of the flood plain) The maximum is 185' (the flood plain plus 35').

Right side minimum width for zone 1&2 is 35' and maximum is 80' (the flood plain plus 35')

Zone 3 is optional because this is cropland.

Zone 3, warm season grasses, may be placed up gradient of zone 2 and have a minimum width of 35' to a maximum width of 100'.

In this example, the minimum width required (zones 1 & 2) is 45' and 35' left and right respectively.

The maximum width with zones 1, 2, & 3 maximized is 285' and 180' left and right respectively.
